

Copy of correspondence from ELDC to Partney resident concerning littering

I have put a plan of works together to litter pick the areas we looked at yesterday. I can confirm that the grass section/dyke at Partney service station will be litter picked and cleared tomorrow, as will the footpath on Partney Road from Spilsby to Partney service station.

I have put down that we litter pick Northfield Road from the crossroads on the A158 as far as we can, as I mentioned to you yesterday, we are restricted on certain verges as we have to leave a 1.5m gap from the white line, this is to ensure operatives are adhering to our risk assessments and our safe system of work polices.

I will get the A158 litter picked from Partney service station all the way along pass the junction to the sign for the Partney turn off. This will likely be done after the Easter period. The stretch of road after this heading to Skegness we would not be able to do without traffic management, again this due to the bends and narrow verges. I will look at options with our operations manager Tom Winning for a date.

Regarding the other areas, Partney service station to Dalby this area is covered by the Neighbourhoods North area, as is the stretch from the roundabout to Sausthorpe. I have already spoken to the North supervisor, who has said what I said yesterday. We can do these areas, but it will have to be set up for traffic management due to the bends, small verges.
